File Properties	
Filename	IMG_3451
Document Type	JPEG file
Application	Adobe Photoshop Lightrooom 6.3 (Windows)
Date Created	12/02/2016, 8:56:42 PM
Date File Modified	13/02/2016, 2:24:36 PM
Dimensions	4752 x 3168
Dimensions (in inches)	19.8" x 13.2"
Resolution	240 ppi
Bit Depth	8
Color Mode	RGB
Color Profile	sRGB IEC61966-2.1
Copyright Status	Unknown
Camera Data	
Exposure Mode	Auto
Focal Length	20.0 mm
Lens	EF-S18-55mm f/3.5-5.6 IS
Max Aperture Value	f/3.5
Date time Original	12/02/2016, 8:56:42 PM
Flash	Did not fire, compulsory mode
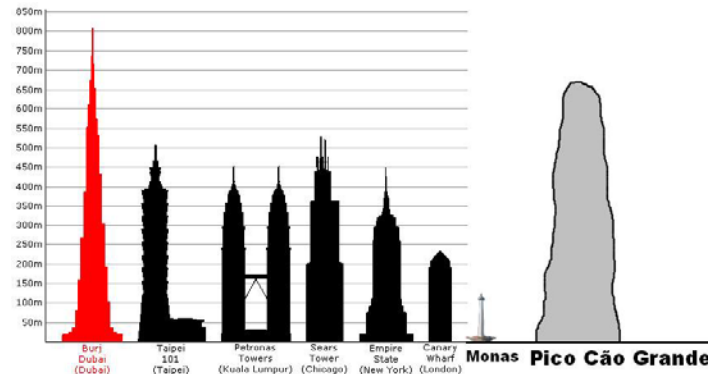

Filename	18-Pico Cao grandee m s. tome-mais alto que arranhaceus.jpg
Document type	JPEG file
Application	Google
Date Created	31/07/2016, 9:42:13 AM
Date file Modified	21/07/2016, 9:42:13 AM
File Size	38KB
Dimensions	858 x 450
Bit depth	8
Colour Mode	RGB
Colour Profile	C2

Filename	Miles.jpg
Document Type	JPEG file
Date Created	9/5/2016, 5:19:32 PM
Data File Modified	9/05/2016, 5:19:32
File Size	194 KB
Dimensions	1600 x 1200
Bit Depth	8
Colour Mode	RGB
Colour Profile	sRGB IEC61966-2-1 black scaled

Metadata

Metadata is data that gives information about other data. Metadata can be used for helping people find the item they are looking for by using a number of different tools such as tags, keywords, date modified, file size, document type and many more. Metadata can be created automatically from the instant of creation, through automated information processing, or can be done manually. Metadata can be added to an image for example could a change a filename, add tags, ratings and metadata is added when the photo is edited in programs such as Photoshop. (You can see this data in my camera image under the camera raw section.) To remove metadata you can use programs such as Adobe Bridge and document inspector in Microsoft word. Furthermore there are add-ins which are designed to remove any metadata from email attachments. Finally, there are server based systems, such as facebook, which removes metadata upon the upload of the file.

METADATA
